PROFESSIONAL SUMMARY

Associate QA Engineer with practical experience in manual, API, and basic performance testing across ERP, e-commerce, healthcare, and job portal systems. Proficient in Postman with a strong focus on defect detection, regression safety, and reliable releases. Seeking to contribute to a growth-oriented team while expanding expertise in quality assurance and product reliability.

EXPERIENCE

Associate QA

Aug, 2025 - Present

Dome Infosys

Kathmandu, Nepal

- Executed independent manual testing of web and mobile applications across multiple domains including ERP, e-commerce, job portals (employer & candidate), education platforms (teacher & student), women's healthcare, and doctor-patient service systems.
- Documented defects with clear steps to reproduce, actual vs expected results, screenshots/logs, and impact analysis.
- Carried out regression testing after bug fixes and during release cycles to ensure no impact on existing functionality.
- Collaborated directly with developers for defect clarification, retesting, and production validation.

PROJECTS

Multi Tenant Job Portal (*Jobscater*)

- Completed end-to-end testing of Admin dashboard, Employer site, and Jobseeker site, including features like job posting, applications, resume creation, Google login, chat, ATS flow, and status tracking.
- Communicated bugs with clear steps, screenshots, and details, and coordinated with developers to verify fixes.
- Carried out regression and retesting across builds to ensure all features and user roles worked correctly.

Healthcare Platform

- Executed end-to-end testing of Admin portal, Doctor app, and Patient app, covering appointment booking, doctor availability, Khalti payments, prescriptions, video/audio calls, chat, and home service with map navigation.
- Tested the app on different devices and operating systems, including scenarios like call drop, reconnect, multiple sessions, and notifications.

- Presented bugs with clear details and screenshots, and collaborated with developers to retest fixes and improve system stability.

ERP System

- Performed functional, regression, and end-to-end testing of an ERP system covering role & permission management, inventory, items, approvals, and procurement modules.
- Verified access control and refresh token validation, ensuring users could access only the features allowed for their roles.
- Documented defects, retested fixes, and maintained system stability across modules.

EDUCATION

Bachelor of Information Technology (BIT)	Dec, 2021 - May, 2025
<i>Texas College of Management & IT (Lincoln University)</i>	Mitrapark, Kathmandu

TRAINING/CERTIFICATIONS

Quality Assurance	2025
--------------------------	------

Mind Risers Consortium Pvt. Ltd.

- During 2.5 months of training, learned manual testing concepts including test case design, bug reporting, and SDLC/STLC.
- Gained hands-on skills in automation with Selenium and performance testing using JMeter.

Certification Link: mindrisers.com.np/certificate/validate/MR-81043-QA

SKILLS

Programming Languages: Python

Automation and Testing: Selenium, Pytest, JMeter, Postman

Project Management & Collaboration Tools: Git, GitHub, Slack

QA Skills: Test Planning, Test Case Development, Bug Reporting, Test Automation
